Identify a natural potion or poison - page 34

This is possible with a Herbalism check equal to the DC of the plant's rarity factor, or the TS granted by the plant in the case of Poisons.
It takes 1 Action per 10 DC. With 6 in Herbalism, the time is 1 Action per 15 DC, with 12 points it is 1 Action per 20 DC to perform the check. If you fail with a critical failure, you have come into contact with/ingested part of the potion and suffer its effects.

Acrobatics - page 33

A successful Acrobatics check with DC 15 allows the character to reduce damage by 3 when falling within 6 metres (**Reaction**).

Climbing Down or Up Within 50 cm is difficult terrain, between 50 and 150 cm is doubly difficult terrain, beyond that is falling or climbing. Fall damage is 1d6 damage per 3 metres fallen.

Fall Damage: H(m)/3xD6. For every 3 dice over 20, add 6 damage (X/3)d6+(X/3-20)*6. Prone. Acrobatics Check DC 15 1/2 damage within 9m. Falls on soft surfaces (soft ground, mud, etc.) -1d6 damage.

Climbing/Climbing - page 270

Using a rope to climb, scaling or climbing is equivalent to moving in **double difficult terrain**.

If the check fails, the Action is consumed without moving.

If you get a critical failure, you lose your grip and can make a Reflex Saving Throw at the same difficulty to grab onto something. If you fail the ST, you fall to the bottom.

The difficulties indicated are added together.

Example of Surface	DC
Movement halved	-2d6
Slippery surface	+4
Rough wall with handholds, protruding bricks	+12
A tree, a knotless rope	+15
A wall with a few protruding bricks	+20
A wall with very few handholds	+25
A smooth natural wall with no handholds	+30
You can lean against two opposite walls	-8
You can lean against two corner walls	-4
You can use a rope	-8
Use a rope to lower yourself	12
Use a rope to climb	15
The rope has knots	-3

In case of Critical Success, you climb as if it were difficult terrain and not doubly difficult terrain.

Athletics - page 34

The **long jump distance** is equal to 30cm for the result obtained in the check, rounded to the nearest whole number. E.g. if in the jump test I jump 11, the jump will be $30\text{cm} \times 11 = 330\text{cm} = 3$ metres long, with 16 in the test it is $30\text{cm} \times 16 = 480\text{cm} = 5\text{m}$.

The **distance jumped in height** is equal to 10cm for the result obtained in the test.

In a **long jump**, the highest point of the jump is equal to $\frac{1}{3}$ of the length jumped. If you perform a long jump of 3 metres, halfway through the jump you are 1 metre high. If you do not have at least 3 metres of run-up, you jump half the distance. In the long jump, you jump at most your own movement and half the height.

Performing a jump from a standing position costs 1 Action. A jump performed within half of your movement (i.e. within 4 metres for a human) does not cost any Action, otherwise you consume one Action for Movement and one Action for Jumping.

Following Tracks - page 34

The modifiers indicated apply to the **base difficulty of 15**.

If the terrain is very soft	DC -4
If the terrain is stable	DC +5
If the terrain is hard	DC +10
Depending on size	DC ± 4
Every 3 creatures being pursued	DC -2
Every 24 hours passed	DC +4
Every hour of rain	DC +4
Poor visibility	DC +2
Trying to hide tracks	DC +4

Recognising monsters - page 34

To recognise a monster, make a Knowledge check, which costs 1 action, on:

Arcane: Giants, Constructs, Spirits, Monstrosities, Aberrations, Dragons

Plane: Elementals

Occult: Foul (Devils and Demons), Spirits, Undead

Religion: Spirits, Undead, Celestials

Dungeon: Aberrations, Monstrosities, Muds and underground creatures

Nature: Beasts, Plants, Faeries

The DC of the check is equal to 10 + the creature's Challenge Rating + rarity/notoriety factor (common (0), uncommon (+1), rare (+2), very rare (+4), legendary +(8)). The information obtainable depends on the margin of success achieved.

- *within 2*: name, type, main characteristic
- *up to 7*: which is the best Saving Throw, a resistance/immunity to Conditions, a vulnerability to Conditions, typical attack
- *up to 12*: which is the worst Saving Throw, a resistance/immunity to Conditions, an immunity to Damage, a vulnerability to Conditions, a vulnerability to a type of Damage
- *up to 15*: two immunities to Conditions, an immunity to Damage, a vulnerability to Conditions, a vulnerability to a type of Damage
- *up to 17*: relative challenge rating, i.e. whether it is an easy, medium, high, extraordinary, deadly or epic encounter
- *up to 20*: special attacks and defences

The information obtained is cumulative, meaning that if the check succeeds by 15, you get the information within 2, 7 and 12.

Intimidate - page 34

The character uses **1 Action** and makes an Opposed Check against the Saving Throw on Will with a bonus equal to their Charisma. If the Saving Throw fails, the opponent has -1 to their Attack Roll against the intimidating character until the end of their next round. The opponent must have an Intelligence equal to or greater than -3. The Saving Throw takes a modifier of ± 2 for each difference in size. In case of a critical success, the modifier becomes -2. If the person attempting the Intimidate check makes a critical failure, they suffer the same penalties as if they had been intimidated.

Artist of Escape - page 23

1 Action per 10 DC. 6p 1 Action 15 DC, 12p 1 Action 20 DC.

Stealth - page 34

If you want to move silently, the terrain is considered difficult. Moving at full speed while trying not to make noise imposes a 2d6 penalty on Stealth checks. Using **1 Action**, you can try to hide from your opponents' view. To hide behind a creature, it must be at least 3 sizes larger than you (otherwise, the creature only provides cover).

Survival - page 35

Survival can be used in place of **Disable Devices** with a -1d6 penalty to disable traps or locks. 1 Action per DC. For every three points gained in the Survival check above 13, the character is able to **find food** for themselves and one other person, provided they are in an environment capable of sustaining life.

Handle Animals - Tame an animal - page 34

is a **Animal Handling** check with a DC of $12 + 2 * GS$ of the animal. It takes 1 minute per 3 DC, with 6 points the time is 1 minute per 6 DC, with 12 it is 1 minute per 10 DC to perform the check. The creature must have Intelligence -3 or higher.

Swimming - page 34 - 239

In calm water DC 10, in rough water DC 15, in very rough water DC 20, stormy DC 25. The check is necessary to stay afloat or swim. Swimming in water is considered **difficult terrain**.

First Aid - page 34

If the character has negative Hit Points, they are dying. The First Aid check, 3 Actions, with a difficulty of 12 plus the value of the negative Hit Points, will bring the character to 0 Hit Points, i.e. unconscious. Each time the character returns to below 0 Hit Points, the difficulty of the First Aid check increases by 2. A successful check (DC 15) allows you to recover 1d4 Hit Points after a combat or grants a +2 bonus to a Saving Throw against a poison. Must be done within 1 round of the end of combat. Cost: 2 minutes. With a score of 6, it costs 1 minute and you recover 1d4+4 HP. With a score of 12, it costs 3 rounds and you recover 2d4+8 HP; with a score of 18, it costs 1 round and you recover 3d4+12 HP. A successful check (base DC 12) reduces **Bleeding** damage by 1. For each Bleeding value above 1, the difficulty increases by 2. Cost: **2 Actions**. A 1-minute treatment guarantees 1 success, no check required. Each successful critical check reduces bleeding by an additional point. A successful check (base DC 13) to **care for 8 hours** of a patient restores twice as many Hit Points, with a minimum of 4, and grants a new Saving Throw against Natural Lays or Poisons already in effect. If performed during rest hours, the person administering the treatment will be Fatigued.

Saving Throw for Magic from Objects - page 337

DC = 12 + 2 x manifested spell level

Monster Spell Saving Throw - page 104

DC is 10 + 2 x spell level + Intelligence or indicated modifier

Auto Magical Critical Success - page 102

The spellcaster can decide to spend, in addition to the **Magic Points** of the spell, an equal amount to automatically gain a **Magical Critical Success**. Each time you want to apply an additional Magical Critical Success beyond the first, the Magic Point cost increases by 1. The declaration of intent to use Auto Magical Critical Success must be made before making and passing the Magic Check.

The casting time of a spell enhanced in this way increases by 1 Action.

Reading a Scroll - page 342

- 18 Creatures, excluding you, within 6 metres of you suffer 3d10 unavoidable Strength damage

- **Punitive Magic:** a companion paying twice the cost of the spell in Magic Points can allow you to roll an extra die in the Magic Check. This ability can be used up to 3 extra dice per spell. On the part of the companion, it is a Reaction Action to be declared before the Magic Check.
- **Effective Magic:** a companion paying three times the spell's cost in Magic Points allows you to ignore one die rolled in the Magic Check. This is a Reaction Action on the part of the companion, to be declared after the Magic Check.
- **Ethereal Magic:** by increasing the Magic Points spent on the spell by 3, your spells have full effect on ethereal or incorporeal creatures. Immediate Action to be declared before casting the spell.
- **Magical Sacrifice:** by reducing their Maximum Hit Points by 4, the caster gains 1 Magic Point to be used when casting a spell. You cannot sacrifice more than half of your current Hit Points at a time. Immediate Action.
- **Pitiful Magic:** by increasing the Magic Points spent by 3, spells inflict temporary damage. Spells that inflict damage of a particular type (such as fire) inflict temporary damage of the same type. 1 Action.
- **Targeted Magic:** For every 2 Magic Points you pay in addition to the spell's cost, you can exclude one person from the spell's area of effect. You cannot exclude more people than the number of times you have taken the Adept of Magic Feat. 1 Action.
- **Far Magic:** By increasing the Magic Points used by 1, you increase the spell's casting range by up to 9 metres. 1 Action.
- **Increase casting time** from 2 Actions to 3 Actions decreases the Magic Points spent on casting the spell by 1, with a minimum cost of 1 Magic Point.
- **Circle of Power:** multiple spellcasters who are all Devotees or Followers of the same Patron can work together to help one of them cast a spell more successfully. Each caster sacrifices half of the Magic Points of the spell cast by their companion and passes a Magic Check. For every two companions who pass the Magic Check, a critical magic success is generated, up to a maximum of 7 critical magic successes. The casting time of a spell using Circle of Power becomes at least 1 Turn. Prerequisite: Magic Skill 5.
